AUTHOR INDEX

Baitinger, William F.
Vapor Treatment of Cotton Upholstery Fabrics With Trimethylborate, p. 103

Benisek, L.
Toxicity of Off-Gases From Fibers and Fabrics: A Note, p. 41

Brakefield, Charles
Year-Round Energy Balances With Fiberglass Solar Screening, p. 58

Cline, Charles D.
Latex Thickeners, p. 180

Currin, C.G.
Silicone — Glass Cloth For Solar Glazing, p. 92

deVry, William E.
Latex Backcoatings for Automotive Interior Trim, p. 143

Eagles, Dana B.
Novel Adsorptive Textile Fibers, p. 122

Grant, Robert R.
Coating: Science, Engineering or Art?, p. 78

Hilado, Carlos J.
Ignition of Fabric-Cushion Systems, p. 63

Huttlinger, Patricia A.
Ignition of Fabric-Cushion Systems, p. 63

Kardashian, Ralph
Electron Processing For the 1980's — Economic and Technological Considerations, p. 131

Kreis, Ronald W.
Some Practical Aspects of Surfactants In Textile Latex Applications, p. 196

Latta, Bruce M.
Coating Industrial Fabrics — A Review, p. 113

Lopatin, George
Novel Adsorptive Textile Fibers, p. 122

Manami, Hirokazu
Experimental Verification of the Method of Deformation Analysis of Coated Plain-Weave Fabrics by Biaxial Tensile Tester, p. 11
Experimental Research on Uniaxial and Biaxial Tensile Strength of Coated Fabrics With Variously Shaped Defects, p. 24

Miller, W.P.
Fundamentals of Binder Chemistry, p. 208

Moldovan, D.M.
Latex Compounding Materials and Their Effects on Product Application Properties, p. 152

Nakahara, Yoshio
Experimental Varification of the Method of Deformation Analysis of Coated Plain-Weave Fabrics by Biaxial Tensile Tester, p. 11

Experimental Research on Uniaxial and Biaxial Tensile Strength of Coated Fabrics With Variously Shaped Defects, p. 24

Quint, Jack M.
Latex Backcoatings For Automotive Interior Trim, p. 143

Saxe, Barry
Smolder Resistant Backcoating Technology for Upholstered Furniture Fabric, p. 73

Van Wert, B.
Silicone — Glass Cloth for Solar Glazing, p. 92

Wang, A.E.
Fundamentals of Binder Chemistry, p. 208

Watson, S.L.
Fundamentals of Binder Chemistry, p. 208

SUBJECT

Acrylic latex backcoating, p. 143

Active carbon, p. 122

Adsorptive fibers, p. 122

Anisotropy of tensile strength, p. 24

Antimony trioxide FR, p. 137

Arcing resistance, p. 143

Backcoating technology, p. 73

Biaxial tensile tester, p. 11, p. 24

Calendering, p. 113

Cellulosic, p. 103

Coated fabric with a defect, p. 24

Coating, p. 113

Coating systems, p. 78

Dielectric heat sealing, p. 143

Electron cure, p. 131

Ethylene/vinyl/acetate latex, p. 208

Exterior shading, p. 58

Fabric cushions, ignition, p. 63

Fiberglass solar screening, p. 48

Finite-element method, p. 11

Flame retardance, p. 41, p. 143

Flame retarding PVC, p. 137

Frothing agents, p. 196

Hollow fibers, p. 122

Impregnation, p. 113

Industrial textiles, p. 113

Laminating, p. 113

Latex, p. 196

Latex binders, p. 208

Latex castings, fabrics, p. 152

Latex conductivity, p. 143
Latex thickeners, p. 180
LC_{50}, p. 41
LD_{50}, p. 41
Membrane structure analysis, p. 11
Microporous fibers, p. 122
Natural polymers, p. 180
Nylon fabrics, p. 143
Pantavalent antimony FR, p. 137
Phase separation spinning, p. 122
Polyester fabrics, p. 143
Process engineering, p. 103
Protective garments, p. 122
PVC coated fabrics, p. 137
Solar glazing, p. 92
Silicone/glass cloth, p. 92
Smolder resistance, p. 103
Styrene/butadiene latex, p. 208
SunScreen® , p. 58
Surfactants, in latexes, p. 196
Tensile strength, p. 24
Thermal conductivity — solar screening, p. 58
Time to death, p. 41
Toxicity of fabrics, p. 41
Toxicity of fibers, p. 41
Toxicity of fire effluents, p. 41
Toxicity of off-gases, p. 41
Treatment (chemical), p. 103
Trimethyl borate, p. 103
Ultra-violet shading, p. 58
Upholstered furniture, smolder resistant, p. 73
Vinyl/acrylic latex, p. 208
Wool, p. 41
